

# Job Search Techniques

Securing your next job or internship can be challenging. Resources are available to you to learn about organizations that are hiring and find a job that aligns with your goals. Here are several job search tools to start utilizing.

## Quick Tips:

- x Use the filters and select the tabs critical to your search. This can include job type, experience level, location, or salary.
- x Use these platforms to find new opportunities but apply to each job on the company careers page or employment section.
- x Reminder: The most important aspect of job searching is utilizing your network. Connect with your professors and program coordinators to stay connected and let them know you are searching for a new opportunity. *For more information on networking, check out the [How To Guide on Networking](#) from Career Services.*
